EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

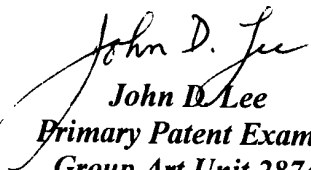

The following is an Examiner's Statement of Reasons for Allowance: The prior art fails to disclose or suggest a method or device for shaping the waveform of an optical signal utilizing two cascaded optical gates as claimed. As claimed, an optical signal is input to the first optical gate wherein space-level noise of the optical signal is suppressed, and the output of the first optical gate is input to the second optical gate wherein mark-level noise of the optical signal is suppressed. The closest prior art of record is represented by the documents listed by applicant on the attached form PTO-1449, but none of these documents describe the cascaded optical gate technique (with specific noise suppression) that is claimed. The two documents cited by the Examiner on the attached form PTO-892 describe non-optical wave shaping techniques and devices which use plural gates, and there is no suggestion of their applicability to optical signal shaping. Since applicant's claimed waveform shaping method and device is distinct from the prior art, it follows that communication systems relying on such waveform shaping methods and devices are also distinct. Claims 1-24 herein are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
